

# PF v2.0 Pilot Note Template (v1.0)

Brief worksheet for recording what a PF pilot tested, what happened, and what should change.

**Use posture:** A pilot note is a learning trace, not proof that PF works. Use it to record legibility, contestability, repair, handoff, drift, and revision signals.

## 1. PILOT BOUNDARY

<b>Pilot name / case:</b> _____	<b>Date / period:</b> _____
<b>Pilot setting / team / context:</b> _____	<b>Prepared by / role(s):</b> _____
<b>Pilot type:</b> legibility / contestability / repair / boundary-handoff / other _____	<b>Stake level / reversibility:</b> low / medium / high; reversible? _____

## 2. CORE PILOT NOTE

<b>1. What was tested?</b> What PF use, scaffold, process, or decision practice was tried? _____ _____	<b>2. What evidence was observed?</b> Name concrete traces: records, critique, harm signals, repair, handoffs, delays, dissent. _____ _____
<b>3. What became clearer?</b> Did the pilot improve legibility, contestability, responsibility mapping, repair, or handoff? _____ _____	<b>4. What did not work?</b> Where did it become checklist-like, suppress dissent, diffuse responsibility, or overclaim? _____ _____

## 3. LEARNING SIGNALS

Learning question	What did we see?	Implication / change
<b>Legibility</b>	Could others reconstruct reasoning? _____	_____
<b>Contestability</b>	Could critique matter without retaliation? _____	_____
<b>Repair / handoff</b>	Were triggers, ownership, and limits visible? _____	_____

## 4. REVISION AND FOLLOW-THROUGH

<b>Decision after pilot:</b> continue / narrow / pause / stop / hand off _____	<b>Revision needed?:</b> wording / scaffold / governance / evidence / training _____
<b>Who owns next step?:</b> _____	<b>Revisit trigger / date:</b> _____
<b>Publication posture:</b> public / internal / anonymized / not publish _____	<b>Open critique / notes:</b> _____
